Subject: draft CFAC email update

Hey Mike,

What do you think? - As we are set to build our distribution list, I'd like to send out periodic updates about the CFAC site. Please see the message below as an example that I'd like to send out **later today or tomorrow**. For process, I would include you, Lisa Dewitt and Mark Chalfant for review (with Jeni Flatow as an FYI) before I hit send. Thoughts? Edits changes to update?

You are receiving this message as an update about the Columbia Falls Aluminum Company (CFAC) proposed Superfund site in Columbia Falls Montana. These messages will be sent out periodically and when new information is available.

Please share this information with other interested people. If you would like to receive these emails directly, please send an email to moler.robert@epa.gov. If you do not want to receive these updates, please respond to this email with "REMOVE" in the subject line of the email.

Project Leaders and Contacts: EPA is the lead agency for the site and Mike Cirian is the Remedial Project Manager. His contact information is 406.293.6194; Cirian.Mike@epa.gov. Lisa Dewitt is the Superfund Project Manager with the Montana Department of Environmental Quality. Her contact information is 406.444.6420; Lidewitt@mt.gov. Robert Moler is the EPA Community Involvement Coordinator for the CFAC site and his contact is 406.457.5032; moler.robert@epa.gov.

Sampling: The 960 acre CFAC site is currently being sampled in order to determine the nature and extent of contamination as a result of operations from 1955 - 2009. The results of the investigation will determine cleanup needs at the site and identify potential cleanup options. EPA will alert the public when the results of the investigation are available for review.

Community Interviews: EPA staff will be in Columbia Fall June 14 – 17 to conduct an initial round of community interviews as part of a broader effort to develop a community involvement plan (CIP). A CIP is an EPA document that identifies the strategies for public engagement that are most appropriate for CFAC stakeholders and the local community. You may be contacted to participate in an interview.

EPA is working with SKEO, a national contractor, to develop the CIP. They will be on site to be a part of the interviews and will conduct additional research for the CIP. A draft CIP will be available for review and feedback on the draft will be encouraged. We hope to have a final CIP that incorporates public feedback ready by the end of the year.

Please help: If you know people that you think would be good for EPA to talk with about community outreach associated with the CFAC site, please send an email to moler.robert@epa.gov. This is the first round of interviews. EPA expects to conduct a follow up round of interviews later in the summer or fall. EPA will continue to conduct community interviews as an important part of long-term community involvement planning, evaluation, and engagement. Any recommendations of people to contact are warmly appreciated, thank you!

Community availability: EPA staff will likely have time around interviews to meet with anyone if interested to touch base in person. If you are interested in meeting with Mike Cirian or Robert Moler with the EPA, please contact Robert Moler at 406.594.0588.

Website and Information Repositories: In order to provide public access to information about the CFAC site, EPA has developed a webpage to provide an overview of the site with links to relevant documents. The website can be found at: <https://www.epa.gov/superfund/columbia-falls>.

Physical copies of documents related to the site are available for review or photocopy at two information repositories:
